“

The goal to end hunger is falling behind schedule...
Al-furqaan Global Resources Ltd. is here to the rescue
through integrated farming solutions.

□ OVERVIEW:

The most effective way to improve the lives of millions in poverty is to support agriculture in developing countries like ours. Most of the world's poor are farmers, and those who cannot spend much of their income on food.

Transforming a country's agriculture sector can create jobs, raise incomes, reduce malnutrition, and kick-start the economy on a path to middle-income

growth. In fact, almost every industrialized nation began its economic ascent with an agricultural transformation. Recent examples include Brazil, China, and Vietnam, each of which at least doubled the value of its agriculture sector within 20 years of starting its transformation. Many other countries in Africa, Asia, and Latin America are earlier on the path of transformation.

For some, agricultural transformation has not advanced as planned or has stalled. Navigating the complexity of a transformation is invariably tough for governments, even though they may prioritize agricultural investment and recognize how important it is to get things done right.

This is especially true in an era in which governments are seeking agricultural transformations that meet multiple goals simultaneously. In addition to traditional economic development and poverty reduction goals, governments are also focusing their agricultural transformation plans on Sustainable Development Goals (SDGs) by considering, for example, climate-smart strategies, women's economic empowerment, and biodiversity – meaning that the drivers of agricultural transformation are multidimensional, interrelated, and change over time, but they can be organized into categories to provide a better opportunity for pragmatic diagnostics and decision making on national priorities. On this premise, **AL-FURQAAN is here to be part of the emerging agriculture transformation in Nigeria and globally.**

MESSAGE FROM THE MANAGING DIRECTOR

AL-FURQAAN GLOBAL RESOURCES LTD.

“To transform agriculture, we must speed up innovations and collaboration.”

Our research and work experiences at **Al-furqaan Global Resources Ltd.**, has proven agricultural production is overflowing with uncertainty and threat factors. There are many factors outside of farmers' control that can affect their return on investment (ROI) and profitability, making risk management an essential agribusiness practice. One area that has impacted farmers in 2022 and still being witnessed has been the continued rise in input prices. Initially fueled by supply chain disruptions from the sudden impacts of COVID-19, agricultural producers have been facing increased production costs on key inputs since 2020.

AL-FURQAAN is here to work to support the development of agriculture to aid human life through making available healthy and hygienically consumable foods, processing them, storage and marketing of resources (farm produce) including information relevant to agribusinesses and farms which highlight up-to-date strategies for the growth and expansion of Nigeria's agricultural industry. As one of the fastest growing indigenous commercial farming companies with the human capacity to become a global industry player, we grow several marketable crops, grains, plants and livestock - assisting agribusiness owners and farm families in dealing with stress related to volatile markets and unusual weather. We build capacity of agribusinesses and farms to address economic issues in business planning, operational management, strategic decision making, marketing and business transition in the agro-allied industry.

While we continue to carry on with our agribusinesses, it's therefore, our pleasure to invite you to leverage the gains associated with our integrated farming services and tell the stories yourself.

 **Abdulrahman Muhammad Tumbido**
Managing Director/CEO (AGRL)

WHO WE ARE (ABOUT US):

We Are Commercial Farmers, and care very much about the growth of agriculture and agri-businesses in Nigeria at the most profitable and corporately operated levels. **AL-FURQAAN Global Resources Ltd.** is a smart farming specialist with extensive experience of agricultural and rural industries, spinning special focus to work to deploy the best of resources, leveraging collaborative efforts of all industry stakeholders to steady agriculture through integrated farming services as a means of diversification – food security, wealth and job creation.

Our core values center on playing a leading role in the industry and tracking farmers' relationships with those who need their products home and abroad, aggregating industry interventions in the forms of grants or loans as a enabler for smallholder farmers and evolving robust agri-marketing plans that guarantees better returns on investment.

As a new generation farmers with vested interests in providing farming services aimed at sustaining human life, feeding animals and growing plants, we fully engage in profitable agriculture and helping other farmers to produce healthy foods: food products used for human consumption, in animal feeds, chemicals or pesticides used in farming and have other applications in the agricultural sector.

As a practice and a profession, the agro products we grow are those that are basically of food related and are processed from raw food material and also manufactured foods. **These encompass food grains, sugar, oil seeds, dairy products, meat, fish, etc - known to be raw materials for both agricultural industries and non-agricultural industries.**

AL-FUROQAN
GLOBAL RESOURCES LTD.
AGRICULTURAL SERVICES, GENERAL CONTRACTS & SUPPLIES

RC: 820882

With over a decade of good track record in integrated farming services in Nigeria, one of our greatest strengths lies in our numerous expert staff members with a wealth of specialized knowledge and technical skill in the industry. We are also able to undertake a wide range of farming procedures in production processes, ranging from agribusiness operations such as trading, conversion (exchange) of farm products into raw materials as well as packaging and export, to conducting extension services, inputs supplies/maintenance as we take active initiatives toward achieving advanced levels of safety and product quality in the value chain.

We also aim to improve the bargaining power of farmers, sharing of expertise and collective pulling of resources through facilitation of co-operative development - helping to promote agribusiness support through value-adding, provision of advisory services to unlock opportunities, partnerships and acquisition of funding for increased investment in the agribusiness sector of Nigeria.

“

As a part of our end-to-end solutions package for our customers who buy or recommend our products, we equally undertake contract production of agricultural produce in our own farms, leased farms and on contract farming arrangement with the farmers. We believe in offering a solution to the customer much beyond just the product by working along with the customer to meet their product quality and quantity requirements.

- Our breeding program is comprehensive in targeting high value traits, including suitability for mechanized cultivation and provide both the food buyers preferences (yield, disease, pest resistance, abiotic stress tolerance) and processing industry requirements (superior quality, uniformity, round the year availability etc.). **AL-FURQAAN** owns and manages farms with open-field irrigated crops, plants, greenhouses with high-quality foods/vegetables and record yields, as well as packing houses, and cooling and post-harvest facilities for high-quality exports and local agricultural produce.

It employs over 67 people, including farm workers and managers, and soil, water, irrigation, hydrology mechanical and civil engineers who are poised to see that we continually deliver on the sustainable agriculture goals of the govt. of President Muhammadu Buhari.

OUR MISSION

- Producing healthy, hygienic foods, working together with other local cooperative farmers and investors in the industry, designing, building, supervising, maintaining and managing our integrated modern farms in all aspects of the operations. To remain a trusted, economic and safe source of food for consumers while meeting or exceeding the high standards imposed by both our own local to federal government and world-respected regulatory authorities.

OUR VISION

Creating a future where pure foods are available for everyone to enjoy the health benefit of nature by integrating state of the art modern agriculture (farming) technological advancements with the basic biology of the ecosystem towards the improvement of rural livelihoods and sustainable food systems.

OUR CORE VALUES

We celebrate and respect diversity in nature and among the people, partners, and communities with whom we work. We are unified by one mission, one brand, and one common set of values in delivering our farming services:

- **Integrity:** We live the principles we call on others to meet. We act with integrity, accountability and transparency, and we rely on facts and science to guide us and to ensure we learn and evolve.
- **Respect:** We honor the voices and knowledge of the people and communities that we serve, and we work to secure their rights to a sustainable future in agriculture.
- **Collaboration:** We deliver impact at the scale of the challenges we face through the power of collective action and industry innovation.

We are a fast growing farming company into agri-production, processing and export of Nigerian food items and animal products including but not limited to food staples, nuts, spices, vegetables, seafoods and dairy. Our attention to food safety, hygiene, global standards and customer satisfaction stands us apart from our competitors.

Recognizing the importance of technology and striving to use it to benefit Nigeria's agrifoods consumers and providing good marketing platforms for their products including protecting our precious natural resources, is at the heart of all we do.

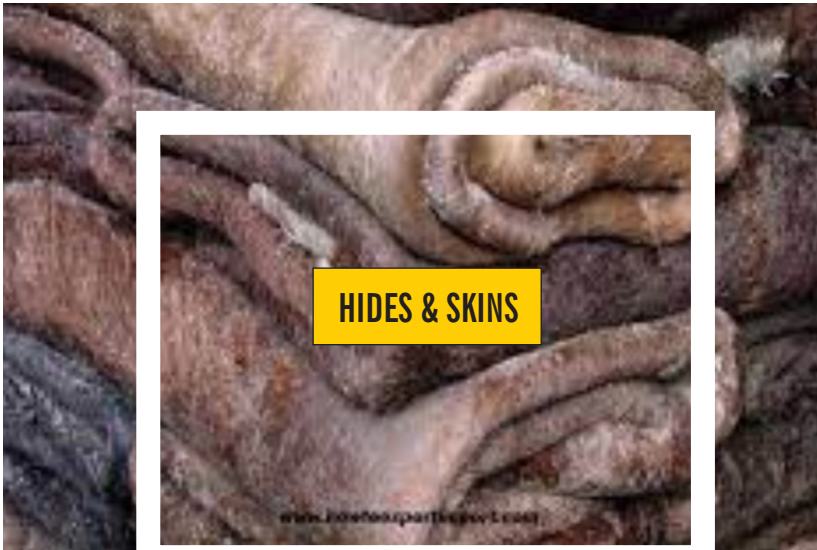

The challenge of how we'll feed the exploding world population in the future – in a sustainable, cost-effective and environmentally friendly way – is seeding an agricultural revolution.

AL-FURQAAN works with both public and private stakeholders to improve access to, adoption of, and sustainable use of quality agricultural inputs (seeds, plant protection products, and fertilizer), as well as critical farm services, such as extension services, custom tillage, output marketing, aggregation and storage, microfinance, and veterinary supplies and services.

AL-FURQAAN Global Resources Ltd. farm factories aim to create high quality, consistent products in an environmentally and economically efficient way. We operate several industrial farming facilities that raise large numbers of farm staple foods and animals such as **Poultry, Beef, Milk, Bees (Honey), Palm, Fruits, Nuts, and Vegetables etc** in intensive care environments where their well-beings are freely upheld in a humane manner sustainably. Our growth has been driven by taking advantage of inherent opportunities in the value chain built around our insights, and adding value through strategic partnerships to provide state of the art farm products and agribusiness services to Nigerians and our customers locally and overseas on an ongoing basis.

“
Al-qurfaan Global Resources Ltd. is committed to supplying the marketplace with all we produce in our farms that are safe for consumption by our customers. We are committed to doing our part to ensure the security of our farm products from the field to the store.

OUR INSPIRATION WHY WE VENTURED INTO AGRICULTURE

Our passion in this industry is inspired by the current need for comprehensive, holistic approach in meeting the Nigerian national food security needs for our growing population including job creation and income generation.

The need for sustainable resource management is increasingly urgent. Demand for agricultural commodities is rising rapidly as the world's population grows. Agriculture's deep connections to the world economy, human societies and biodiversity make it one of the most important frontiers for human living around the globe, thus our sincere inspiration:

- 1. To Encourage Improvement in Local Infrastructure:**
We build-up communities where we work and make them livable.
- 2. Job Creation:** Our commercial farming services is a great source of jobs - helping to stimulate the growth of the local economy.
- 3. Lowering the Price of Products:** By raising the stakes, **Al-furqaan** is working to see that healthy varieties of foods, animals and plants are in surplus, affordable and thereby reduce cost of farm products.
- 4. Increased Production and Enhancing Food Security:**
To operate a commercial farming that mechanizes operations, controls diseases and pests, enabling our farms to produce more.

5. **Lowering the Cost of Production:** We employ more efficient methods of production, making our operations cheaper in the long run.
6. **Provision of Raw Materials for Agribusiness Manufacturing:** Our goal is fashioned to avail more raw materials to feed the local and international industries that engage in the production or manufacture of agricultural by-products.
7. **Foreign Exchange earning:** To help our nation earn a high foreign exchange. For instance, in West Africa, cocoa and coffee exports have earned the respective countries lucrative foreign exchange, which is an economic growth booster.

AL-FURQAAN
GLOBAL RESOURCES LTD.

AGRICULTURAL SERVICES, GENERAL CONTRACTS & SUPPLIES

OUR COMMITMENT, STRENGTH & PHILOSOPHY:

- **EMPLOYEES:** We recognize that our employees are an integral part of the AL-FURQAAN farming team and are our most important resource. We are committed to providing our employees with leadership based on honesty and integrity and treating them with fairness, respect and dignity. We vow to provide them with an enjoyable, safe, and rewarding work environment.

- **CUSTOMERS:** We listen to them and strive to provide quality farm products and services that exceed their expectations by operating to improve our processes.

- **QUALITY:** Our number one goal is quality. We are committed to embracing and employing total quality assurance and control standards in every aspect of our agribusiness.

- **FOOD SAFETY & SECURITY:** We are committed to ensuring the security of our farm produce from the field to the store.

BUSINESS PRACTICES: We are committed to utilizing ethical agribusiness practices, state-of-the-art technology, and good management practices to sustain progressive growth and financial success in agriculture and its value chain.

Committing to good agricultural practices, we operate to keep the communities where we work safe and give support (s) as part of our company's social responsibility efforts.

□ THE EXECUTIVE TEAM & STAFF

Our team's paramount goal is to promote agricultural practices and policies designed to provide abundant healthy foods, fiber and other agribusiness service while maintaining the fertility of the soil and protecting the earth's climate and the native diversity of plants and animals.

“We work closely with retail farms, wholesalers, distributors, suppliers, marketers, and food and beverage (FnB) practitioners who are committed to local and international sustainability.”

CAPACITY BUILDING:

Identification and mobilization of Change agents in the agriculture transformation corridor:

The success of any agricultural transformation relies on how well millions of smallholders and small-and medium-size enterprises can be helped to change farming practices as quickly and effectively as possible. The critical enabler, without which an agricultural transformation is likely to fail, is a frontline “change agent” that helps farmers modify their practices. Change agents are people who farmers trust and interact with regularly. The high-level objectives of a transformation are realized in practice only when they are effectively translated to smaller, on-farm shifts.

For example, increased productivity in the dairy sector might be achieved through farmers accessing better animal health technologies and better cattle breeds or joining dairy cooperatives to sell their milk. Change agents provide the critical interface with farmers. ***To catalyze this, a change agent might be the person providing extension knowledge, offering financing for farming inputs such as fertilizer, aggregating crops, or facilitating marketing services.***

For example, a change agent can help farmers make the transition from growing wheat to more complicated but lucrative opportunities such as raising tomatoes, vegetables, and orchard crops.

Al-furqaan Global Resources Ltd. is firmly rooted in working to inspire the willingness of government, donors, farmers, companies, and civil society organizations to take risks and change behaviors to pursue a better industry outcome as needed before and during the development of agricultural transformation plans. Both political and financial capital are at stake for public-sector investors, and securing high-level commitment will ensure the farming development process produces more clearly defined practical plans that have a higher likelihood of being implemented towards a better agriculture and its activities across board.

□ OUR SERVICES (WHAT WE OFFER YOU):

Here at **Al-furqaan Global Resources Ltd.**, we are heavily involved in the farming and agriculture sector. We grow agrifoods for both local and international consumption and markets through our 'inclusive journey', agricultural knowledge, and relationships - utilizing a variety of our expert marketing services.

It's no surprise as to why so many farming and agriculture brands choose us to help accelerate growth, increase sales and including market share of shareholders:

Our farming activity is focused around six (6) ambitious service areas with our employees at the center. Recognizing that the challenges facing the smooth growth of agriculture (farming) in the nation are increasingly more complex and urgent, we have refined the way in which we work to deliver improvements in this direction.

Our ever evolving working strategy puts smallholder farmers and partners at the center of our farming activities leading to organize our operations around these six (6) key areas: healthy food production and safety, crop planting, livestock, products processing/marketing, inputs and fertilizer procurement and distribution. By linking these six areas in an integrated approach, we can better leverage our unique assets and direct all our resources/manpower to supporting national food security and job creation including caring for communities where we work.

□ PRODUCTION (FOODS, ANIMALS & PLANTS):

Al-furqaan Global Resources Ltd. is investing in integrated farming to produce healthy foods, crops, livestock and plants for customers' daily consumption, raw materials, income generation and export.

As a new generation farmers with vested interests in providing farming services aimed at sustain human life, feeding animals and grow plants, we fully engage in profitable agriculture and helping other farmers to produce healthy foods: food products used for human consumption, in animal feeds, chemicals or pesticides used in farming and have other applications in the agricultural sector. As a practice and a profession, the agro products we grow are those that are basically of food related and are processed from raw food material and also manufactured foods. These encompass food grains, sugar, oil seeds, dairy products, meat, fish, etc - known to be raw materials for both agricultural industries and non-agricultural industries.

AL-FURQAAN Global Resources Ltd. operates about 116-acres farm in Northern Nigeria, which is involved in production of horticultural and agricultural products including procurement and supplying of premium fertilizers, appropriate education on best practices for farming, and proper deployment of these practices for optimum results.

- Crop And Fresh Vegetables

We at **Al-furqaan** are dedicated to making, distributing, and supplying the best agricultural products in the market. We use superior (quality) seeds, raw materials, stringent processes and exceptional quality control to ensure each piece of crops and equipment that leaves our farming environment is second to none. If you can't find the farm produce you're looking for, let us know and we will explore a way to ensure we can meet your needs. While we are extremely proud of the farm products we make, we are even prouder of the health and economic benefits they provide to our customers and the nation.

AL-FURGAAN also farms a variety of healthy, wholesome and nutritious vegetable products essential to a healthy lifestyle. We are a dedicated fresh produce company with over a decade experience providing you with great value, customer service and a superb selection of conventional and organic fresh food crops, fruits and vegetables, including a fantastic range of specialty items and delicious dried fruits that you would have difficulty finding in a regular farms or supermarkets.

□ AGRO-PROCESSING (FRESH PRODUCE):

Agro-processing is now regarded as the sunrise sector globally, to salvage the lingering food insecurity. Our services in this direction comprises a set of technological and economic activities carried out for conservation and handling of agricultural produce and to make it usable as food, feed fibre, fuel or industrial raw material. **For us at Al-furqaan Global Resources Ltd.,** we provide all inclusive agro processing services in the agribusiness value chain that guarantees rewarding return on investment in agribusiness.

Our unhindered collaboration with several agro-processing companies provides the best of innovative approaches in this segment of the industry. The possibilities are endless. “By creating a common set of compliance standards, we are creating a sustainable path to delivering Nigerians food that will help them live healthier, more productive lives.”

□ LIVESTOCK & POULTRY FARMING: Pasture, and Breeding Management

The highly dynamic livestock sector is rapidly changing in response to the ever-increasing demands of the growing population, especially in developing countries. Thus, judicious management and eco-intensification of livestock-based systems can also address the daunting challenges.

AL-FURQAAN livestock-farming and business is an enterprise owned and operated by us and takes pride in offering a service to the agricultural industry and the customers of the various income categories. **We have been in the livestock; cattle, poultry industry our entire operations and have experience on both the buying and selling side of the ever-changing livestock markets.** It gives our company and staff the advantage to getting our sellers top Return on Investments (RoI) for their livestock trade.

Our company engage in mass production of chickens, chicken meat and eggs including that of turkeys, ducks, geese, guinea fowl and quail that are farmed for their meat and eggs, for both family consumption and marketing/export.

CATCHING TEAMS, CATCHING, STUNNING, EVISCERATION CLEANING AND CHILLING.

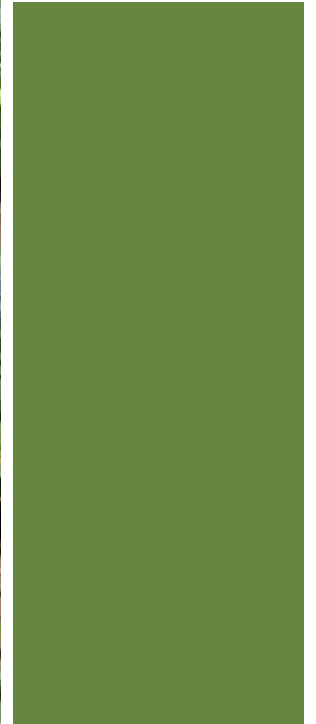

□ HIDES & SKINS:

Hides and skins constitute valuable material removed from the animal carcass. Hides refer to the skin of cows and buffaloes while that of goat and sheep is called a skin.

The hides and skins value chain has a huge potential to generate income and employment opportunities. But it is constrained by many challenges such as inadequate public investment, lack of trained personnel, poor quality of hides and skins, limited value addition, lack of quality and modern processing machines, inadequate availability of raw materials for local factories due to exports in the raw form, high post-harvest losses and underutilization of the capacity of local factories. Stakeholders of our leather value chain include farmers, producers and processors, local buying agents and service providers. All our hide trimming, liming and dyeing are done with state-of-the-art equipment in controlled environments to ensure a flawless finishing.

We work with key actors in the hides and skins value chain: the pastoralists, agro-pastoralists, ranchers and feedlot operators. Others include informal cattle and small ruminant producers, slaughter slab owners, abattoir owners and butcheries to serve both our local and overseas markets through export.

❑ **MARKETING AND SUPPLY CHAIN MANAGEMENT:**

Marketing plays a crucial role in providing livelihoods for farmers and people employed along the food supply chain. It also contributes in reducing food insecurity across the globe that provides greater choice in consumer goods.

Supply chain management and marketing of agri-products at **Al-furqaan Global Resources Ltd.** are anchored to serve all categories of healthy foods buyers locally including international food chains, modern format retailers, five star hotels, gourmet restaurants etc. We offer procurement solutions by facilitating backward integration of processors with farmers for secure and reliable raw material supply.

We leverage on our in-depth knowledge of various commodities and the extensive backward linkages we have established with other cooperative farmers to provide a highly cost-effective procurement system from

vegetables, food crops, grains to plants and livestock which is operated under what we call the **PQRST Factors of Procurement: Right Price-Quality-Quantity-Source-Relationship-Time**. We enable our customers to source the right quality and quantity at the right price and time continuously.

We work closely with key agri-business stakeholders, taking time to understand and craft out effective brand strategies that are harmoniously built into the architecture of your farming businesses. From farm to fork and beyond, we are here every step of the way to ensure the successful marketing of your agricultural products. We help build positive, trustworthy brands with considered marketing strategies to launch products that ultimately transform the ability to attract new agri-businesses and generate the much desired revenue.

□ EXPORT SERVICES (AGRO PRODUCTS):

We pride ourselves on our long standing client relationships cultivated through years of unparalleled corporate company's services and healthy foods (farm products) delivery.

We offer our customers a complete service package to make the entire export process run smoothly. **Al-furqaan Global Resources Ltd.** can provide custom rations, export packing and container consolidation.

At Al-furqaan, we have the capability to ship the agricultural products that we produce or in collaboration with our affiliate farmers from production areas in Nigeria to delivery destinations overseas or here around Africa. **Whether** through truck, container, barge, vessel, or rail we will meet your logistical requirements leveraging our sound experiences in international trade procedure and close cooperation with our expert associates and suppliers - meeting the future needs of worldwide agriculture.

As we are equally a logistics company, our clients can rely on us to take care of complicated customs and payment procedures in addition to transport arrangements involved in exports.

□ CONSULTANCY SERVICES

A Catalyst To Drive Digital Transformation in Agriculture Industry

As an agricultural consulting company working as a middle man between farmers, government and other industry stakeholders, we render advisory services to farmers and boosting programs tailored to enhance agribusiness growth, which has made us an integral part of the agricultural business chain in Nigeria.

One of the most important aspects of our agricultural consultancy services, is to establish a strong customer relationship management (CRM) system with farmers and those needing their products across Nigeria and in export, especially now that the industry is going through the era of fierce competition; connecting to farmers digitally, capturing their farm data, analyzing this data, and providing advisory and marketing services accordingly towards arresting key significant challenges hampering the right agriculture growth. ***“We double our efforts in serving multiple client farmers from the agriculture industry through our next-generation agriculture digital platforms, which helps us maintain a close coordination with client farmers through a single, digital agriculture platform while strengthening this bond to grow stronger.”***

Supplying of premium Fertilizers

**...connecting buyers
and end-users in the
agriculture value
chain.**

At AL-FURQAAN Global Resources Ltd., another key focus area has always been to cater to the growing fertilizer demand of the domestic market in Nigeria and also to work towards bringing a green revolution to the country, keeping in mind clients' needs across the 14-million farming households in Nigeria. Ours is a collection of satisfied customers resulting in the increased patronage of carefully formulated products which include NPK 20-10-10, NPK 15-15-15, NPK 27-13-13, and crop-specific special blends.

Bridging the gap between Farmers and Government interventions in agriculture

An Assured Strategy to Boost Financial Inclusion and Livelihoods

AL-FURQAAN operates to assist in providing robust openings between prospective and already established farmers for good financial access and services from government and other agro-grant providers for the sole purposes of agricultural growth – helping to raise their capacities, incomes and providing more predictable cash-flows.

The farmers need access to finance for more expensive input packages and to grow their farms. They also need savings and financial literacy to make sure that they are investing their boosted incomes wisely, and budgeting properly for a long growing season with lumpy cash-flows. A collaboration with a financial service provider just like what the federal government of Nigeria is currently doing under President Muhammadu Buhari through the agriculture-intervention programs of the Central Bank of Nigeria, has the potential to radically transform agriculture while simultaneously strengthening financial inclusion in the country.

This marking a good beginning for indigenous farmers in Nigeria, with thousands of farmers still to engage nationally, more land and crops to expand into, we at **Al-furqaan Global Resources Ltd.** shall continue to target life changing strategies in the sector backed by unhindered financial interventions for farmers, better food prices, soil management and better integrated farming practices - poised to increase the productivity, resiliency and quality of life for hundreds of thousands of smallholders and those hoping to expand into bigger horizons.

□ OUR PARTNERS:

The Al-furqaan Global Resources Ltd.

partnership (AGRP) is a collective of organizations and with a shared vision in enhancing factors for the delivery of our agricultural value chain fixing, financing and risk management mandate.

We partner with **SMEs, government institutions, investors, input companies, mechanization partners, digital partners, off takers/market, technical partners, financial institutions, development finance institutions (DFIs), multilateral partners, research institutions, industry associations,** and alliances whose mission are in synergy with Al-furqaan. In all the partnerships, we aim to leverage each other's resources towards increasing food production and economic growth in Nigeria.

By promoting sustainable agriculture, the partnerships are supporting farmers across Nigeria to realize the global sustainable development goals of ending hunger, achieving food security and improving nutrition.

Various farm equipment and machinery are changing the ways of farming constantly. We can say that overall farming is no longer an easy process, but rather a complex procedure that needs huge and complex machines to work on thousands of hectares and deliver results in good record time. A large farm owner like AL-FURQAAN cannot imagine running its farms without the use of the modern farm equipment. This machinery are not just changing the agriculture ways but also improving farmers' life.

CULTIVATION, IRRIGATION, SEEDING, PLANTING, TRANSPLANTING AND HARVESTING EQUIPMENT

**AL-FURQAAN'S
ORGANOGRAM**

The long-term agribusiness success of Al-furqaan Global Resources Ltd. depends on our ability to continually improve the quality of our foods products while protecting people and the environment.

**OUR HEALTH,
SAFETY, QUALITY
CONTROL &
ENVIRONMENTAL
POLICY
(HSE/QC).**

**We are always
committed to: ▶**

We place emphasis on ensuring human health, operational safety, environmental protection (HSE), product quality control/enhancement, and community goodwill.
